

ROHIT BHATU

Surat • +91 8347190250 • rrbhatu2003@gmail.com • rohit.bhatu.in

I'm a passionate Frontend Engineer focused on building modern, accessible, and performant web experiences using React, TypeScript and Tailwind CSS. I design and implement user interfaces that are pixel-perfect, responsive, and pleasant to use. I enjoy solving UX problems, optimizing performance, and mentoring teammates to ship high-quality products.

Experience

MAY 2022 – APR 2023

Frontend intern | Aavrti Technology | Surat, Gujarat

Contributed to real-world, production-level projects, where I improved my coding practices, enhanced my debugging efficiency, and strengthened my teamwork and collaboration skills throughout the development lifecycle.

MAY 2023 – MAY 2024

Associate Frontend engineer | Odan Infotech | Surat, Gujarat

Collaborated with the development team to build and implement responsive web applications, ensuring timely project delivery while managing technical challenges, risk assessment, and complex issue troubleshooting. Worked closely with designers to enhance UI/UX consistency, creating intuitive, visually appealing, and user-focused interfaces.

JUNE 2024 – OCT 2025

Senior Frontend engineer | Yashworld Products Private Limited | Surat, Gujarat

Lead and manage a cross-functional team of backend developers, frontend developers, mobile app developers, and UI/UX designers to ensure efficient project execution. Designed, developed, and optimized scalable, high-performance web applications while overseeing code quality, conducting reviews, and enforcing best practices to maintain strong development standards across the team.

Skills

JavaScript • Typescript • React JS • Next JS • Redux toolkit • GraphQL • Git • GitHub

OS

Ubuntu • macOS • CentOS • Debain (with KDXPlazma)

Deployment

Cloudflare • Vercel

Education

2021

Certification Course | Oscar Career Point | Surat, Gujarat

2021

HSC | I.P. Savani high School | Surat, Gujarat

2019

SSC | I.P. Savani high School | Surat, Gujarat

Achievements

Effective Collaboration • Code Quality and maintenance • Continuous Learning

Projects

Patients Bond - Aavrti Technology

An all-in-one hospital management system designed to track every essential patient detail in one place. It manages patient profiles, current condition updates, prescription records, bed allocations, assigned doctors, and doctor attendance. The system also supports hardware integrations for seamless hospital operations. It provides a unified platform where administrators and medical staff can monitor and manage all patient-related activities efficiently and accurately.

BSL academy Admin Panel - Odan Infotech

It's a streamlined admin panel designed to manage the entire learning platform with ease. It supports multiple user roles with customizable permissions, offers clear analytics for courses and user activity, and allows quick management of students, teachers, and study materials like books, videos, and courses. A flexible settings section lets admins control app branding, metadata, formats, and overall system configuration—all in one simple, efficient dashboard.

Calendar Planner - Odan Infotech

As a simple all-in-one solution for social media management, the Calendar Planner lets users connect to their social channels, schedule posts, and automate their publishing. It supports three roles—super-admin, admin, and user—allowing admins to organize tasks, manage categories, invite team members, and control permissions. A responsive, easy-to-read calendar provides a clear visual overview of all scheduled tasks and posts.

CTD App - Odan Infotech

An advanced case-management MVP built for law firms, the CTD app helps lawyers organize client information, documents, and ongoing case details with ease. It supports multiple roles—including lawyer, admin, client, and custom roles—allowing smooth workflow control and secure access. With growing user adoption, the app delivers

a clean, efficient system for tracking cases, managing clients, and keeping all legal data perfectly organized in one place.

Construction Management Software - Odan Infotech

A fully integrated construction management system built for contractors, builders, and real estate companies, combining ERP, CMS, and HRMS capabilities in one platform. It supports super admin, admin, and user roles, with admins able to create custom roles, manage site warehouses, track stock, handle accounts, generate purchase orders, and produce detailed reports. Super admins can define project types, limits, and fixed values. The system wraps everything—from sales and purchases to project management, manpower tracking, employee management, and attendance—into a single advanced solution for streamlined construction operations.

Hivestaff - Yashworld Products Pvt. Ltd.

Enterprise-grade management platform built to handle complex organizational workflows with ease. It centralizes employee management, HR operations, leave processing, purchases, and project management while offering a dedicated AI agent for smart automation. The system includes deep custom permission controls and scope-level module access, making it highly flexible for large teams with layered hierarchies. I designed the complete system architecture for this app, ensuring scalability, security, and smooth integration across all modules.

Cannacraft - Yashworld Products Pvt. Ltd.

Cannacraft is a fully custom e-commerce platform built specifically for cannabis retail, featuring both a modern storefront and a powerful admin system. I designed the complete system architecture—from frontend and backend to deployment—to ensure smooth performance and high scalability. The storefront supports product browsing, carts, secure checkouts, user accounts, and order tracking. The admin suite includes advanced inventory management, warehouse control, payment tracking, prescriptions handling, and detailed reporting. It also supports multiple role-based accesses such as user, admin, back-office, social media manager, purchase manager, pharmacist, doctor, and accountant, making it a complete end-to-end operating solution for a regulated e-commerce business.

Ganga Fashions - Yashworld Products Pvt. Ltd.

I built a fully custom e-commerce website for Ganga Fashions using Shopify, developing a unique theme inspired by the Prestige template. The project included converting Figma designs into a pixel-perfect, responsive storefront that reflects the brand's ethnic fashion aesthetic. I implemented multi-level categories and subcategories, gift card functionality, and custom product variants to support their extensive SKU range. The entire site was performance-optimized to ensure a smooth, high-quality shopping experience across all devices.

Club 96 - Freelance

I developed a fully custom e-commerce website for Club96 using Shopify, creating a modern and performance-optimized theme tailored to the brand's lifestyle-focused identity. The storefront was built from scratch using Shopify Liquid, HTML, CSS, and JavaScript, ensuring a fully responsive and visually polished experience. Key features include dynamic product sections, advanced filtering, smooth checkout flow, and an intuitive admin setup.

for easy product and inventory management. The result is a fast, premium online shopping experience that reflects the brand's contemporary image across all devices.

Cricket Gully - Freelance

I created a dynamic cricket-focused website that delivers live scores, news updates, and in-depth cricket insights while being fully optimized for ad-based monetization. The platform features fast, interactive interfaces built with React and includes strong SEO enhancements to boost visibility, performance, and search rankings. It provides fans with a smooth, engaging experience across all devices.
